## **E.J. KRAUSE ANNOUNCES LAUNCH OF CRITICAL INFRASTRUCTURE RESILIENCE EXPO: A WHOLE NATION APPROACH**

**Bethesda, MD - October 19, 2012** - E.J. Krause & Associates in cooperation with InfraGard Maryland Chapter, and other federal, state, and local agencies, and the private sector, are pleased to announce the launch of **Critical Infrastructure Resilience Expo** and conference. The event will be held on October 7-8, 2013 in Annapolis, MD.

Threats to our critical infrastructure sectors have become one of our biggest vulnerabilities. Whether for purposes of economic espionage or bringing down electric grids, telecommunications systems, water systems, or other key infrastructures, these threats plague our safety and economic vitality. **Critical Infrastructure Resilience Expo** creates an opportunity to learn, prepare, and effectively implement resilience management.

The event focuses exclusively on protecting the nation's emerging threats and solutions to critical infrastructure, covering four of the most important sectors outlined in the presidential initiative for critical infrastructure protection. Areas comprised will include energy security, cyber security, transport security and communication security.

The conference and exhibition with its keynotes, workshops, and tabletop exercises will identify the political, regulatory, intelligence, and operational challenges we face to keep our critical infrastructure secure and resilient. Solution providers from around the globe will exhibit best of breed technologies, products, and services for CI resilience. In addition, the event will include a high level conference which will analyze in-depth the challenges and solutions we are currently facing.

**CI Infrastructure Resilience Expo** will bring together security professionals from around the world, creating an excellent networking opportunity as well as a meeting place to exchange ideas, information, and display the most innovative products and services that are currently shaping the critical infrastructure security industry.
